PROJECTS

EventSphere – Expo Management System

Technologies: MongoDB, Express.js, React.js, Node.js (MERN Stack)

- Developed a responsive React.js frontend to streamline expo registrations and enable real-time data visualization.
- Engineered a scalable Node.js/Express REST API architecture to efficiently handle high-traffic registration periods.

Star Security Services – Security Management System

Technologies: ASP.NET, Bootstrap, C#, JavaScript

- Built an interactive administrative dashboard with secure authentication to manage records for 2800+ employees.
- Optimized backend performance using C# and ASP.NET to deliver seamless real-time updates and ensure data availability.

COVID-19 – Online Test & Vaccination System

Technologies: PHP, HTML5, CSS3, JavaScript, MySQL

- Developed a comprehensive health platform using PHP and MySQL to manage online test bookings and vaccination tracking.
- Designed a dynamic and accessible user interface focused on clear data visualization for digital medical reports.

Zyro Agency – Digital Marketing Agency Platform

Technologies: ASP.NET Core, C#, Entity Framework, SQL Server, RESTful APIs

- Architected a market-ready platform from scratch using ASP.NET Core, balancing clean frontend design with automated backend services.
- Implemented secure relational databases with SQL Server and Entity Framework, ensuring cross-device UI responsiveness.
